

Percentage of GDP used for transport infrastructure investment by mode (EEA32)

Trends of transport infrastructure investments in relation to GDP between 1995 and 2008. Only those countries (20 in total) for which complete datasets were available for road, rail, inland waterways, sea and air have been included in Figure 1. They are: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Hungary, Italy, Liechtenstein, Lithuania, Luxembourg, Norway, Poland, Portugal, Slovakia, Spain, Switzerland and the UK. Data was not available for Italy in 2008, so 2007 data was used as a proxy.

What is the GDP share of infrastructure investment by mode in EEA Member Countries?

Green tips

Dispose of toxic materials properly!

The best way to dispose of paint is to deliver it to your local specialist waste recycling centre. If you do not have access to one of these, let the paint dry fully, adding sawdust or cat litter as needed, before putting it in the dustbin. Don't throw it down the drain, because it is toxic and it interferes with the processes of water treatment plants. [More green tips](#)
